

Our Story

Root 66 Farms is made up of entrepreneurs, farmers, agronomists and geneticists all passionate about bringing hemp breeding and cultivation to new heights in the Midwest.

1950s

Once home to a beautiful equestrian ranch, situated along the historic Route 66 Highway. Farm & ranch fell into disrepair and sat idle for many years... including the last remaining, iconic Meramec Caverns barn.

2019

Organic hemp farming arrives in Pontiac, IL. Working with the Route 66 Preservation Society, the ranch and iconic barn are being restored to their former glory. And Root 66 Farms is helping to revitalize the Pontiac farming community at the same time.

What We Do

ORGANIC & SUSTAINABLE
Mark Doudlah (One of the pioneers of the Organic Movement in the Midwest) spearheading the Root 66 Farms Organic Program

COMPLIANCE LEADER
Partnered with leading software company that will be providing plot-to-purchase compliance software built on blockchain

SUPERIOR GENETICS
Leading the way in marker-selected breeding for sustainable large-scale production including a proprietary microbial biostimulant offering 20-30% higher yields

NEW Organic Certified Strains Coming Soon

Seeds | Starts | Clones

2 Certified Organic Farms (Evansville, WI & Pontiac, IL)

Pantheon Tissue Culture & Cloning Center (Evansville, WI)

Additional Services
